Schwartz & Pelzman,

IF PEOPLE would only realize what an amount of misery and loss of precious lives the drinking of contaminated raw milk has produced they would clamor for a law preventing the sale of raw milk altogether. All would have to be sterilized at a central bereau before being offered for sale. But it takes only about he minutes to scale your own milk, and thus amounts practically to sterilizing? this amounts practically to startlining it.

IT IS NOT TEVE, as is frequently hold, that scalding affects the sigestibility of the milk or practices, as a rule, constipation. Besides, this would be a small matter compared with the ever present danger of swallowing colonies of typhold, scaried fever, or diphtheria scenies.
